

PREQUALIFICATION

Cleared Before the Price Conversation

This is the register your reviewer is working from — what we hold, and the form each item arrives in. If your gate asks for something that isn't on this page, ask for it. It either exists or we'll tell you it doesn't.

ISSUED ON REQUEST

W-9, certificates of insurance, and electrical license numbers are issued on request — the COI named to your certificate holder, with the endorsements your contract calls for. Registrations are maintained, not one-time; if a profile has lapsed or a document is out of date when you check it, say so and we will fix it before the review, not after.

References: plant references of comparable size and audit regime are available on request. We don't publish client names — they're given directly, with the plant's permission.

REQUESTING THE PACKAGE

Reply to any Patriot email, or write to us with the company, the site, and the documents your reviewer needs. No form, no portal, no sales call attached.
